CompuGroup Medical releases the 2010 Annual Report

German eHealth company again publishes the annual report online

Koblenz - 24 March 2011: Koblenz-based CompuGroup Medical AG today published the full Annual Report 2010. Following last year's success, CompuGroup Medical has again eliminated the printed paper version and instead provides an interactive version of the report available online on the website <http://report2010.cgm.com/english>. The paperless report saves costs, saves the environment and provides for enhanced information content with easier access and rapid navigation.

The online business report offers users a number of benefits. For example, it is possible to download Excel tables from the business report and use them directly in your own calculations. Also, we bring interactive content, animations, videos etc. into the report to make it faster, easier and more engaging to learn about CompuGroup Medical.

"I can only repeat what we said last year", states CEO Frank Gotthardt. "We have spent more than 20 years to help doctors, dentists and hospitals move from paper-based patient records to electronic medical records, and in that process greatly enhanced the value of information. It is only natural that we adopt the same paperless philosophy when we share information with our shareholders and others who are interested in CompuGroup Medical."

The content of the Annual Report 2010 follows the preliminary results that were already published on February 4th this year. In 2010, CompuGroup Medical managed to expand its international business operations, to intensify customer loyalty and achieve record sales of 312 million euros. Earnings before taxes, depreciation and amortization (EBITDA) were 67 million euros. For 2011, CompuGroup Medical expects sales revenue of between 395 and 420 million euros and operating profit (EBITDA) between 86 and 93 million euros.

About CompuGroup Medical AG

CompuGroup Medical is one of the leading eHealth companies in the world. Its software products are designed to support all medical and organizational activities in doctors' offices and hospitals. Its information services for all parties involved in the healthcare system and its web-based personal health records contribute towards safer and more efficient healthcare. CompuGroup Medical's services are based on a unique customer base of over 370,000 doctors, dentists, hospitals and networks as well as other service providers. CompuGroup Medical is the eHealth company with one of the highest coverage among eHealth service providers worldwide. Approximately 3300 highly qualified employees in 25 countries support customers with innovative solutions for the steadily growing demands of the healthcare system.
