## **Effective continued education: virtual learning program now available for physicians**

CompuGroup Medical is introducing the INMEDEA simulator to the consumer market

**Koblenz, May 16th, 2011: Pilots have a flight simulator and the INMEDEA simulator now makes this technology a reality for physicians and those aspiring to become one with an electronic platform that clinicians can use to learn and continue their education by means of real examples. The application accompanies the user during the treatment of clearly presented cases - from a simple knee reflex up to interventions. The certified software credits the user with continued education points and can now be purchased through retailers or online.**

Physicians and medical students can now use the INMEDEA simulator in the comfort of their home for targeted testing and training of their theoretic and practical knowledge. The virtual patient cases are structured to closely mirror real-life situations - users can make decisions about diagnostic steps, make diagnoses and check their actions for conformity to treatment guidelines. The software uses numerous images and short films to clearly present the cases and has won several awards.

### **Collect continued education points with the INMEDEA simulator**

Physicians who still need to collect continued education points can be happy because medical associations have accepted the e-learning tool as a certified continued education instrument. This allows clinicians to easily pursue their continued education - anytime and anywhere. Users can choose from among three topics:

- The most frequent disorders in four individual modules.
- A collection of tropical medicine cases with varying degrees of difficulty.
- Two modules for post-mortem review.

Depending on the number of modules, medical students will pay 30 to 60 euros and physicians between 100 to 130 euros. The e-learning tool can be purchased through retailers, e.g. Amazon. The INMEDEA website ([www.inmedea.com](http://www.inmedea.com)) has links to all of the online offers.

### **Grade "A" for the excellent preparation of the learning content**

CompuGroup Medical closely works with medical schools and hospitals in designing the INMEDEA simulator. This ensures that the basic medical knowledge and the patient cases are always up-to-date. First users have already graded the learning content as good or very good and feel that the case modules are very well prepared. Starting right now, effective learning at high standards is achievable!

### **About CompuGroup Medical AG**

CompuGroup Medical is one of the leading eHealth companies in the world. Its software products are designed to support all medical and organizational activities in doctors' offices and hospitals. Its information services for all parties involved in the healthcare system and its web-based personal health records contribute towards safer and more efficient healthcare. CompuGroup Medical's services are based on a unique customer base of over 380,000 doctors, dentists, hospitals and networks as well as other service providers. With locations in 21 countries and customers in 34 countries worldwide, CompuGroup Medical is the eHealth company with one of the highest coverage among eHealth service providers. Approximately 3200 highly qualified employees support customers with innovative solutions for the steadily growing demands of the healthcare system.
