International SOS Clinic in Beijing, China, has 'gone live' with PMO Clinic System from CompuGroup Medical

International SOS – the World's leading healthcare, medical and security assistance company has chosen Electronic Medical Records System and Practice Management Solution from CompuGroup Medical's subsidiary in Malaysia

Singapore and Koblenz, 25.05.2011, CompuGroup Medical AG, one of the leading e-health providers worldwide, is supporting the implementation of an Electronic Medical Records System (EMR) and Practice Management System at the International SOS' Clinic in Beijing, China. These systems will help International SOS realize more efficient patient care and comprehensive cost savings.

The International SOS Clinic in Beijing has already gone live with the PMO Clinic System developed by CGM's subsidiaries in Sweden and Malaysia. It is now CGM's mission to successfully implement the solution in all International SOS Clinics worldwide. The PMO Clinic System has already been implemented in several International SOS Clinics in Nigeria, Ghana, Yemen, Algeria, Kazakhstan and Papua New Guinea and several more clinics are in the planning stage before implementation. The solution includes substantial customization tailored to International SOS' specific requirements, standardized modules and functionality for to store patients' clinical information as well as the streamlining of administrative routines such as billing, pharmacy and inventory management.

CompuGroup Medical utilizes its strength by sharing expertise and technology across countries and continents enabling knowledge transfer between healthcare providers. The Clinic System implementation for International SOS is the same product being used by many of CGM's users in Sweden, South Africa and Malaysia. This implementation is just one example showing how that the cost efficiency and quality of CompuGroup Medical's products and services are based on systematic best practices.

"We are proud and honored that an esteemed organization like International SOS has chosen our solution and placing the trust in our organization for this important project. With the implementation of the PMO Clinic System, relevant medical information based on patient data is made available at the right time and the right place. This is an important and efficient

tool for medical professionals, managers and executives of International SOS which will assist them in making split-second decisions in their important work of saving lives and improving quality of care for their patients", says Rolf-Henry Grønlund, Managing Director of CompuGroup Medical' subsidiary in Malaysia. "CompuGroup Medical grows both organically and by making acquisitions. This optimum balance facilitates the growth required to achieve targets. For that reason, we are confident that we will be able to accelerate the potential growth of our products and services in emerging markets in Asia." adds Grønlund.

About CompuGroup Medical AG
